- 10.2 The Committee agreed that the contents of the paper merited more detailed discussion than could be achieved that day due to the time restrictions imposed by the start time of the Council's meeting which was at 10:30am. - 11.4 The Committee agreed that it would be useful to include on the form a section which dealt with what the various outcomes could be following reporting a concern to the HPC.

**Action: KJ**

- 11.5 The Committee discussed the findings of the MORI research; specifically that opposition had been received with regard to detailing ftp allegations on the HPC website. The Committee were in agreement that as such matters concerned the protection of the public the information should remain in the 'public domain'. Nevertheless the Committee noted that this had been perceived as an unfair procedure for registrants involved and detrimental to their long term career if the allegation was not proven. The Committee agreed that as this was a matter of policy it would be best discussed at the following Council meeting as the MORI research was a paper for its consideration. The Chairman of the Investigating Committee would therefore draw this issue to the Council attention and proposed the need for a possible review. Is this better?
