## Executive summary

The Health and Care Professions Council (HCPC) approve educational programmes in the UK which health and care professionals must complete before they can apply to be registered with us. We are a statutory regulator and our main aim is to protect the public. We currently regulate 16 professions. All of these professions have at least one professional title which is protected by law. This means that anyone using a protected title must be registered with us. The HCPC keep a register of health and care professionals who meet our standards for their training, professional skills, behaviour and health.

As well as approving educational programmes for people who want to join the Register, the HCPC also approve a small number of programmes for those already on the Register. The post-registration programmes we currently approve include supplementary prescribing programmes (for chiropodists / podiatrists, dietitians, radiographers and physiotherapists) and independent prescribing programmes (for chiropodists / podiatrists, physiotherapists, and therapeutic radiographers).

The visitors' report which follows outlines the recommended outcome made by the visitors on the ongoing approval of the programme at the education provider. This recommended outcome was accepted by the Education and Training Committee (Committee) on 25 May 2017. At this meeting, the Committee confirmed the ongoing approval of the programme. This means that the programme meets our standards for prescribing for education providers and ensures that those who complete it meet our standards for prescribing for all prescribers. The programme is now granted open ended approval, subject to satisfactory monitoring.

## Introduction

The HCPC visited the programme at the education provider to consider major changes proposed to the programme. The major change affected the following standards for prescribing for education providers - programme admissions, programme management and resources, curriculum, practice placements and assessment. The programme was already approved by the HCPC and this visit assessed whether the programme continued to meet our standards for prescribing for education providers and ensures that those who complete it meet our standards for prescribing for all prescribers.

This visit was an HCPC only visit. The education provider did not validate or review the programme at the visit and the professional bodies did not consider their accreditation of the programme. The education provider supplied an independent chair and secretary for the visit. The visit also considered the following programmes – Non-Medical Prescribing. A separate visitor report exists for this programme.

## Recommended outcome

To recommend a programme for ongoing approval, the visitors must be assured that the programme meets all of our standards for prescribing for education providers and ensures that those who complete it meet our standards for prescribing for all prescribers.

The visitors agreed to recommend to the Education and Training Committee that the programme is approved.

The visitors did not set any conditions for the programme.

Conditions are requirements that the education provider must meet before the programme can have its ongoing approval reconfirmed. Conditions are set when certain standards for prescribing have not been met or there is insufficient evidence of the standard being met.

The visitors did not make any recommendations for the programme.

Recommendations are observations on the programme or education provider which do not need to be met before the programme can have its ongoing approval reconfirmed. Recommendations are made to encourage further enhancements to the programme, normally when it is felt that the particular standard for prescribing has been met at, or just above the threshold level.
