

HCPC Diversity Data Report 2021: orthoptists

Introduction

The Health and Care Professions Council (HCPC) aims to be recognised as an organisation that actively upholds and promotes best practice in equality, diversity and inclusion. Improving the quantity and quality of our diversity data is an important step towards achieving this aim.

Between December 2020 and March 2021, we collected diversity data in a voluntary survey from 51,710 registrants across 15 health and care professions. This represents 18% of the HCPC Register and a three-fold increase in responses as compared with the 2019/20 survey.

This factsheet provides the key EDI information for the orthoptists and how the demographics of this group compare to the demographics of HCPC registrants overall.

Profession:
orthoptists

Total registered orthoptists:
1,514¹

Number of orthoptists who
responded to the survey:
489

Key findings

- Orthoptists had the largest proportion of registrants under the age of 25 of any profession (11%).
- Orthoptists had the highest proportion of ethnically Asian registrants (15%).
- Orthoptists had the highest proportion of registrants practising in Northern Ireland (5%).
- The vast majority (85%) of orthoptists work in NHS Acute/hospital /secondary care sector.
