

Standards of proficiency

Comparison table:
Operating department practitioners

This table compares the standards of proficiency that came into effect on 1 September 2023 (left) and the standards that were in place before that date (right).

	<u>Current standards (2023)</u>	<u>Previous standards (pre-2023)</u>
	At the point of registration, operating department practitioners must be able to:	Registrant operating department practitioners must:
1	practise safely and effectively within their scope of practice	be able to practise safely and effectively within their scope of practice
1.1	identify the limits of their practice and when to seek advice or refer to another professional or service	know the limits of their practice and when to seek advice or refer to another professional
1.2	recognise the need to manage their own workload and resources safely and effectively, including managing the emotional burden that comes with working in a pressured environment	recognise the need to manage their own workload and resources effectively and be able to practise accordingly
1.3	keep their skills and knowledge up to date and understand the importance of continuing professional development throughout their career	
2	practise within the legal and ethical boundaries of their profession	be able to practise within the legal and ethical boundaries of their profession
2.1	maintain high standards of personal and professional conduct	understand the need to act in the best interests of service users at all times
2.2	promote and protect the service user's interests at all times	understand what is required of them by the Health and Care Professions Council

2.3	understand the importance of safeguarding by actively looking for signs of abuse, demonstrating understanding of relevant safeguarding processes and engaging in these processes where necessary	understand the need to respect and uphold the rights, dignity, values, and autonomy of service users including their role in the diagnostic and therapeutic process and in maintaining health and wellbeing
2.4	understand what is required of them by the Health and Care Professions Council, including, but not limited to, the standards of conduct, performance and ethics	recognise that relationships with service users should be based on mutual respect and trust, and be able to maintain high standards of care even in situations of personal incompatibility
2.5	respect and uphold the rights, dignity, values and autonomy of service users, including their role in the assessment, diagnostic, treatment and/or therapeutic process	know about current legislation applicable to the work of their profession
2.6	recognise that relationships with service users, carers and others should be based on mutual respect and trust, maintaining high standards of care in all circumstances	be able to practise in accordance with relevant medicines legislation
2.7	understand the importance of and be able to obtain valid consent, which is voluntary and informed, has due regard to capacity, is proportionate to the circumstances and is appropriately documented	understand the importance of and be able to obtain informed consent
2.8	understand the importance of capacity in the context of delivering care and treatment	understand the complexity of caring for vulnerable persons in perioperative and other healthcare settings, and the need to adapt care as necessary
2.9	understand the scope of a professional duty of care, and exercise that duty	be able to exercise a professional duty of care
2.10	understand and apply legislation, policies and guidance relevant to their profession and scope of practice	

2.11	recognise the power imbalance that comes with being a healthcare professional, and ensure they do not abuse this for personal gain	
2.12	practise in accordance with relevant medicines legislation	
2.13	understand the complexity of caring for vulnerable persons in perioperative and other healthcare settings, and the need to adapt care as necessary	
3	look after their health and wellbeing, seeking appropriate support where necessary	be able to maintain fitness to practise
3.1	identify anxiety and stress in themselves and recognise the potential impact on their practice	understand the need to maintain high standards of personal and professional conduct
3.2	understand the importance of their own mental and physical health and wellbeing strategies in maintaining fitness to practise	understand the importance of maintaining their own health
3.3	understand how to take appropriate action if their health may affect their ability to practise safely and effectively, including seeking help and support when necessary	understand both the need to keep skills and knowledge up to date and the importance of career-long learning
3.4	develop and adopt clear strategies for physical and mental self-care and self-awareness, to maintain a high standard of professional effectiveness and a safe working environment	
4	practise as an autonomous professional, exercising their own professional judgement	be able to practise as an autonomous professional, exercising their own professional judgement

4.1	recognise that they are personally responsible for, and must be able to justify, their decisions and actions	be able to assess a professional situation, determine the nature and severity of the problem and call upon the required knowledge and experience to deal with the problem
4.2	use their skills, knowledge and experience, and the information available to them, to make informed decisions and/or take action where necessary	be able to make reasoned decisions to initiate, continue, modify or cease treatment or the use of techniques or procedures, and record the decisions and reasoning appropriately
4.3	make reasoned decisions to initiate, continue, modify or cease treatment, or the use of techniques or procedures, and record the decisions and reasoning appropriately	be able to initiate resolution of problems and be able to exercise personal initiative
4.4	make and receive appropriate referrals, where necessary	recognise that they are personally responsible for and must be able to justify their decisions
4.5	exercise personal initiative	be able to make and receive appropriate referrals
4.6	demonstrate a logical and systematic approach to problem-solving	understand the importance of participation in training, supervision and mentoring
4.7	use research, reasoning and problem-solving skills when determining appropriate actions	
4.8	understand the need for active participation in training, supervision and mentoring in supporting high standards of practice, and personal and professional conduct, and the importance of demonstrating this in practice	
5	recognise the impact of culture, equality and diversity on practice and practise in a non-discriminatory and inclusive manner	be aware of the impact of culture, equality and diversity on practice

5.1	respond appropriately to the needs of all groups and individuals in practice, recognising that this can be affected by difference of any kind including, but not limited to, protected characteristics, intersectional experiences and cultural differences	understand the requirement to adapt practice to meet the needs of different groups and individuals
5.2	understand equality legislation and apply it to their practice	
5.3	recognise the potential impact of their own values, beliefs and personal biases (which may be unconscious) on practice and take personal action to ensure all service users and carers are treated appropriately with respect and dignity	
5.4	understand the duty to make reasonable adjustments in practice and be able to make and support reasonable adjustments in their and others' practice	
5.5	recognise the characteristics and consequences of barriers to inclusion, including for socially isolated groups	
5.6	actively challenge these barriers, supporting the implementation of change wherever possible	
5.7	recognise that regard to equality, diversity and inclusion needs to be embedded in the application of all HCPC standards, across all areas of practice	
6	understand the importance of and maintain confidentiality	be able to practise in a non-discriminatory manner

6.1	adhere to the professional duty of confidentiality and understand when disclosure may be required	
6.2	understand the principles of information and data governance and be aware of the safe and effective use of health, social care and other relevant information	
6.3	recognise and respond in a timely manner to situations where it is necessary to share information to safeguard service users, carers and/or the wider public	
6.4	understand the need to ensure that confidentiality is maintained in all situations in which service users rely on additional communication support (such as interpreters or translators)	
6.5	recognise that the concepts of confidentiality and informed consent extend to all mediums, including illustrative clinical records such as photography, video and audio recordings and digital platforms	
7	communicate effectively	understand the importance of and be able to maintain confidentiality
7.1	use effective and appropriate verbal and non-verbal skills to communicate with service users, carers, colleagues and others	be aware of the limits of the concept of confidentiality
7.2	communicate in English to the required standard for their profession (equivalent to level 7 of the International English Language Testing System, with no element below 6.5)	understand the principles of information governance and be aware of the safe and effective use of health and social care information

7.3	understand the characteristics and consequences of verbal and non-verbal communication and recognise how these can be affected by difference of any kind, including, but not limited to, protected characteristics, intersectional experiences and cultural differences	be able to recognise and respond appropriately to situations where it is necessary to share information to safeguard service users or the wider public
7.4	work with service users and/or their carers to facilitate the service user's preferred role in decision-making, and provide service users and carers with the information they may need where appropriate	
7.5	modify their own means of communication to address the individual communication needs and preferences of service users and carers, and remove any barriers to communication where possible	
7.6	understand the need to support the communication needs of service users and carers, such as through the use of an appropriate interpreter	
7.7	use information, communication and digital technologies appropriate to their practice	
7.8	understand the need to provide service users or people acting on their behalf with the information necessary, in accessible formats, to enable them to make informed decisions	
7.9	use effective communication skills when sharing information about service users with other members of the multidisciplinary team	

7.10	use effective communication skills in the reception and identification of service users, and in the transfer of service users to the care of others	
8	work appropriately with others	be able to communicate effectively
8.1	work in partnership with service users, carers, colleagues and others	be able to demonstrate effective and appropriate verbal and non-verbal skills in communicating information, advice, instruction and professional opinion to service users, colleagues and others
8.2	recognise the principles and practices of other health and care professionals and systems and how they interact with their profession	be able to use effective communication skills when sharing information about service users with other members of the multidisciplinary team
8.3	understand the need to build and sustain professional relationships as both an autonomous practitioner and collaboratively as a member of a team	be able to communicate in English to the standard equivalent to level 7 of the international English Language Testing System, with no element below 6.5
8.4	contribute effectively to work undertaken as part of a multi-disciplinary team	understand how communication skills affect assessment of, and engagement with, service users and how the means of communication should be modified to address and take account of factors such as age, capacity, learning ability and physical ability
8.5	identify anxiety and stress in service users, carers and colleagues, adapting their practice and providing support where appropriate	be able to select, move between and use appropriate forms of verbal and non-verbal communication with service users and others
8.6	understand the qualities, behaviours and benefits of leadership	be aware of the characteristics and consequences of verbal and non-verbal communication and how this can be affected by factors such as age, culture, ethnicity, gender, socio-economic status and spiritual or religious beliefs

8.7	recognise that leadership is a skill all professionals can demonstrate	understand the need to provide service users or people acting on their behalf with the information necessary to enable them to make informed decisions
8.8	identify their own leadership qualities, behaviours and approaches, taking into account the importance of equality, diversity and inclusion	understand the need to assist the communication needs of service users such as through the use of an appropriate interpreter, wherever possible
8.9	demonstrate leadership behaviours appropriate to their practice	be able to identify anxiety and stress in service users, carers and others, and recognise the potential impact upon communication
8.10	act as a role model for others	recognise the need to use interpersonal skills to encourage the active participation of service users
8.11	promote and engage in the learning of others	be able to use effective communication skills in the reception and identification of service users, and in the transfer of service users to the care of others
8.12	understand the need to engage service users and carers in planning and evaluating diagnostics and therapeutic interventions to meet their needs and goals	
8.13	understand and be able to apply psychological and sociological principles to maintain effective relationships	
9	maintain records appropriately	be able to work appropriately with others
9.1	keep full, clear and accurate records in accordance with applicable legislation, protocols and guidelines	be able to work, where appropriate, in partnership with service users, other professionals, support staff and others
9.2	manage records and all other information in accordance with applicable legislation, protocols and guidelines	understand the need to build and sustain professional relationships as both an independent practitioner and collaboratively as a member of a team

9.3	use digital record keeping tools, where required	understand the need to engage service users and carers in planning and evaluating diagnostics, treatments and interventions to meet their needs and goals
		9.4 be able to contribute effectively to work undertaken as part of a multi-disciplinary team
		9.5 understand and be able to apply psychological and sociological principles to maintain effective relationships
10	reflect on and review practice	be able to maintain records appropriately
10.1	understand the value of reflective practice and the need to record the outcome of such reflection to support continuous improvement	be able to keep accurate, comprehensive and comprehensible records in accordance with applicable legislation, protocols and guidelines
10.2	recognise the value of multi-disciplinary reviews, case conferences and other methods of review	recognise the need to manage records and all other information in accordance with applicable legislation, protocols and guidelines
10.3	participate in team briefings and debriefings following treatment, procedures or interventions	
11	assure the quality of their practice	be able to reflect on and review practice
11.1	engage in evidence-based practice	understand the value of reflection on practice and the need to record the outcome of such reflection
11.2	gather and use feedback and information, including qualitative and quantitative data, to evaluate the response of service users to their care	recognise the value of case conferences and other methods of review

11.3	monitor and systematically evaluate the quality of practice, and maintain an effective quality management and quality assurance process working towards continual improvement	
11.4	participate in quality management, including quality control, quality assurance, clinical governance and the use of appropriate outcome measures	
11.5	evaluate care plans or intervention plans using recognised and appropriate outcome measures, in conjunction with the service user where possible, and revise the plans as necessary	
11.6	recognise the value of gathering and using data for quality assurance and improvement programmes	
12	understand and apply the key concepts of the knowledge base relevant to their profession	be able to assure the quality of their practice
12.1	understand the structure and function of the human body, together with knowledge of physical and mental health, disease, disorder and dysfunction relevant to their profession	be able to engage in evidence-based practice, evaluate practice systematically and participate in audit procedures
12.2	demonstrate awareness of the principles and applications of scientific enquiry, including the evaluation of treatment efficacy and the research process	be able to gather information, including qualitative and quantitative data, that helps to evaluate the responses of service users to their care

12.3	recognise the role(s) of other professions in health and social care and understand how they may relate to the role of the operating department practitioner	be aware of the role of audit and review in quality management, including quality control, quality assurance and the use of appropriate outcome measures
12.4	understand the structure and function of health and social care systems and services in the UK	be able to maintain an effective audit trail and work towards continual improvement
12.5	recognise disease and trauma processes, and how to apply this knowledge to the service user's perioperative care	be aware of, and be able to participate in, quality assurance processes, where appropriate
12.6	demonstrate awareness of the main sequential stages of human development, including cognitive, emotional and social measures of maturation through the life-span	be able to evaluate intervention plans using recognised outcome measures and revise the plans as necessary in conjunction with the service user
12.7	understand the theoretical basis of, and the variety of approaches to, assessment and intervention	recognise the need to monitor and evaluate the quality of practice and the value of contributing to the generation of data for quality assurance and improvement programmes
12.8	understand relevant physiological parameters and how to interpret changes from the norm	
12.9	understand the principles of operating department practice and their application to perioperative and other healthcare settings	
12.10	understand how to order, store and issue drugs to service users safely and effectively	
12.11	understand the pharmacokinetic and pharmacodynamic effects and contraindications of drugs used	

12.12	understand safe and current practice in a range of medical devices used for diagnostic, monitoring or therapeutic purposes in accordance with national and local guidelines, appropriate to their practice	
12.13	calculate accurately prescribed drug dosages for individual service user needs	
12.14	understand the principles and practices of the management of clinical emergencies and participate as part of a team managing a clinical emergency, where necessary	
13	draw on appropriate knowledge and skills to inform practice	understand the key concepts of the knowledge base relevant to their profession
13.1	change their practice as needed to take account of new developments, technologies and changing contexts	understand the anatomy and physiology of the human body, together with knowledge of health, disease, disorder and dysfunction, relevant to their profession
13.2	gather appropriate information	recognise disease and trauma processes, and how to apply this knowledge to the service user's perioperative care
13.3	analyse and critically evaluate the information collected	be aware of the principles and applications of scientific enquiry, including the evaluation of treatment efficacy and the research process
13.4	select and use appropriate assessment techniques and equipment	recognise the role of other professions in health and social care
13.5	undertake and record a thorough, sensitive and detailed assessment	understand the structure and function of health and social care services in the UK
13.6	undertake or arrange investigations as appropriate	understand the concept of leadership and its application to practice

13.7	conduct appropriate assessment or monitoring procedures, treatment, therapy or other actions safely and effectively	understand the theoretical basis of, and the variety of approaches to, assessment and intervention
13.8	recognise a range of research methodologies relevant to their role	be aware of the main sequential stages of human development, including cognitive, emotional and social measures of maturation through the life-span
13.9	recognise the value of research to the critical evaluation of practice	understand relevant physiological parameters and how to interpret changes from the norm
13.10	critically evaluate research and other evidence to inform their own practice	understand how to order, store, issue, prepare and administer prescribed drugs to service users, and monitor the effects of drugs on service users
13.11	engage service users in research as appropriate	understand the principles of operating department practice and their application to perioperative and other healthcare settings
13.12	understand service users' elimination needs and undertake all sex urinary catheterisation	understand the pharmacokinetic and pharmacodynamic effects and contraindications of drugs used within the perioperative and acute setting
13.13	understand the role of the surgical first assistant in assisting with surgical intervention	understand safe and current practice in a range of medical devices used for diagnostic, monitoring or therapeutic purposes in accordance with national and local guidelines, appropriate to their practice
13.14	undertake appropriate pre-assessment, anaesthetic, surgical and post-anaesthesia care interventions, including managing the service user's airway, respiration and circulation and providing assisted ventilation where necessary	be able to calculate accurately prescribed drug dosages for individual service user needs
13.15	understand the management and processes involved in the administration of blood and blood products	understand the principles and practices of the management of clinical emergencies

13.16	monitor and record fluid balance and, where appropriate, administer prescribed fluids in accordance with national and local guidelines	
13.17	prepare and administer drugs to service users via a range of routes, including oral, rectal, topical and by intramuscular, subcutaneous and intravenous injection	
13.18	understand and recognise the need to monitor the effects of drugs and be able to take appropriate action in response to any significant change or adverse reaction	
13.19	understand common abnormal blood physiology, including blood gas analysis	
13.20	undertake venepuncture, peripheral intravenous (IV) cannulation and blood sampling	
13.21	assess and monitor the service user's pain status and as appropriate administer prescribed pain relief in accordance with national and local guidelines	
13.22	modify and adapt practice to emergency situations	
13.23	understand the principles of life support	
13.24	undertake the management of a service user in cardiac arrest and participate in the team managing on-going resuscitation, where required	
13.25	receive and identify service users and their care needs	

13.26	participate in the briefing and debriefing of perioperative teams and the use of surgical safety checklists	
13.27	formulate specific and appropriate care plans including the setting of timescales	
13.28	effectively gather information relevant to the care of service users in a range of emotional states	
13.29	adapt and apply problem-solving skills to clinical emergencies	
14	establish and maintain a safe practice environment	be able to draw on appropriate knowledge and skills to inform practice
14.1	understand the need to maintain the safety of themselves and others, including service users, carers and colleagues	be able to change their practice as needed to take account of new developments or changing contexts
14.2	demonstrate awareness of relevant health and safety legislation and comply with all local operational procedures and policies	be able to conduct appropriate diagnostic or monitoring procedures, treatment, therapy, or other actions safely and effectively
14.3	work safely, including being able to select appropriate hazard control and risk management, reduction or elimination techniques, in a safe manner and in accordance with health and safety legislation	understand service users' elimination needs, including male and female urinary catheterisation
14.4	select appropriate personal protective equipment and use it correctly	understand the role of the surgical first assistant in assisting with surgical intervention
14.5	establish safe environments for practice, which appropriately manage risk	be able to undertake appropriate anaesthetic, surgical and post-anaesthesia care interventions, including managing the service user's airway, respiration and circulation

14.6	understand the impact of human factors within relevant settings and the implications for service user safety	understand the management and processes involved in the administration of blood and blood products
14.7	promote and comply with measures designed to control infection	be able to monitor and record fluid balance, and where appropriate, administer prescribed fluids in accordance with national and local guidelines
14.8	understand the nature and purpose of sterile fields, and the practitioner's individual role and responsibility for maintaining them	understand and recognise the need to monitor the effects of drugs and be able to take appropriate action in response to any significant change
14.9	understand and be able to apply appropriate moving and handling techniques	be able to assess and monitor the service user's pain status and as appropriate administer prescribed pain relief in accordance with national and local guidelines
14.10	position service users for safe and effective interventions	be able to modify and adapt practice to emergency situations
14.11	understand the principles and ensure the safe use of medical devices used in perioperative, anaesthetic, surgical and post-anaesthesia care	be able to receive and identify service users and their care needs
		14.12 be able to formulate specific and appropriate care plans including the setting of timescales
		14.13 be able to gather appropriate information
		14.14 be able to effectively gather information relevant to the care of service users in a range of emotional states
		14.15 be able to select and use appropriate assessment techniques
		14.16 be able to undertake and record a thorough, sensitive and detailed assessment, using appropriate techniques and equipment

		14.17 be able to undertake or arrange investigations as appropriate
		14.18 be able to analyse and critically evaluate the information collected
		14.19 be able to demonstrate a logical and systematic approach to problem solving
		14.20 be able to adapt and apply problem solving skills to clinical emergencies
		14.21 be able to use research, reasoning and problem solving skills to determine appropriate actions
		14.22 recognise the value of research to the critical evaluation of practice
		14.23 be aware of a range of research methodologies
		14.24 be able to evaluate research and other evidence to inform their own practice
		14.25 be able to use information and communication technologies appropriate to their practice
15	promote health and prevent ill health	understand the need to establish and maintain a safe practice environment
15.1	understand the role of their profession in health promotion, health education and preventing ill health	understand the need to maintain the safety of both service users and those involved in their care
15.2	understand how social, economic and environmental factors (wider determinants of health) can influence a person's health and wellbeing	be able to understand the impact of human factors within the perioperative / acute setting and the implications for service user safety
15.3	empower and enable individuals (including service users and colleagues) to play a part in managing their own health	be aware of applicable health and safety legislation, and any relevant safety policies and procedures in force at the workplace, such as incident reporting, and be able to act in accordance with these

15.4	engage in occupational health, including being aware of immunisation requirements	be able to work safely, including being able to select appropriate hazard control and risk management, reduction or elimination techniques in a safe manner and in accordance with health and safety legislation
		15.5 be able to select appropriate personal protective equipment and use it correctly
		15.6 be able to establish safe environments for practice, which minimise risks to service users, those treating them and others, including the use of hazard control and particularly infection control
		15.7 be able to promote and comply with measures designed to control infection
		15.8 understand the nature and purpose of sterile fields, and the practitioner's individual role and responsibility for maintaining them
		15.9 understand and be able to apply appropriate moving and handling techniques
		15.10 be able to position service users for safe and effective interventions
